Point by Point Description of the Jardin Soft top Screen Room

- Our 14 ounce vinyl tops are made in our own factory. We use a heavier, stronger vinyl with a smoother surface than our leading competitors and the vinyl panels are heat sealed together in both the free standing and wall attached units, not sewn.
- The roof rafters, made of a 1" round GALVALUM metal, extends 5" beyond the screen walls providing a roof overhang.
- Screen Panels are a 1/8" thick extruded aluminum - light weight, but very strong. Panels are 44" in width and 74" high with pre-installed fiberglass screening, top to bottom. The supporting bar is positioned at bottom third of panel for maximum viewing pleasure. The height of the screen panels gives easy walk through and allows for a cooler room on the hot sunny days.
- There is a roof tensioning system is built into the end of the roof rafters and is accessed from within the overhang using a large thumb nut for ease of operation.
- All stainless steel hardware for superior strength & long life.
- The combination of roof overhang, roof tensioning system and roof pitch means water accumulation on the roof is virtually eliminated.
- All panels are bolted together. No silly cables. The supplied hardware is stainless steel for maximum strength and weather-ability.
- Full set of clear or vinyl windbreaker and privacy panels available to enclose your unit from the weather.
- Check out our [Options Page](#) for details and pricing.
- The room SHOULD be screwed to a deck or patio for maximum strength in summer storms.
